

Please REJECT NAB Petition 04-160. I have subscribed to XM Radio for 1-1/2 years. The XM Radio offering is so superior to all other offerings that I no longer have any use for regular radio. Regular radio has too many commercials, DJ's that want to hear themselves talk and formats that I have no interest in. Contrary to this petition, I hope that XM Radio increases their content in ways yet unimagined. Any petition that restricts this right, including the limitation of XM Radio to provide traffic and weather information, unfairly reduces the appeal of this product. To the contrary, in a country that protects Freedom of Speech and encourages the creativity and entrepreneurship of its people and companies, you should be encouraging XM Radio to provide these services and many more. XM Radio should have 1000 stations - not 100. Please allow XM Radio to provide the services that its subscribers - like me - want. Thank you.
